

Eval+

Be ready for Level 2 payment terminal certification.

Overview.

Fime's cloud-based test solution **Eval+** performs Level 2 Terminal Type Approval testing for a range of different international & domestic schemes to ensure complete validation of your terminal products.

Ensure your terminal is ready for payment scheme approval.

To launch innovative and interoperable products, kernel developers, mPOS and POS terminal manufacturers must confirm compliance with the latest payment and transit specifications. **Eval+** validates functional terminals compliance against the most extensive range of payment schemes reducing costs, mitigating risks and speeding up time to market.

How it works.

Eval+ is a cloud-based software platform, test suites, and Probe+ hardware. Connect to the test environment via any internet browser using your subscription based user account, and use Probe+ to emulate test cards to perform transactions, and analyze the results.

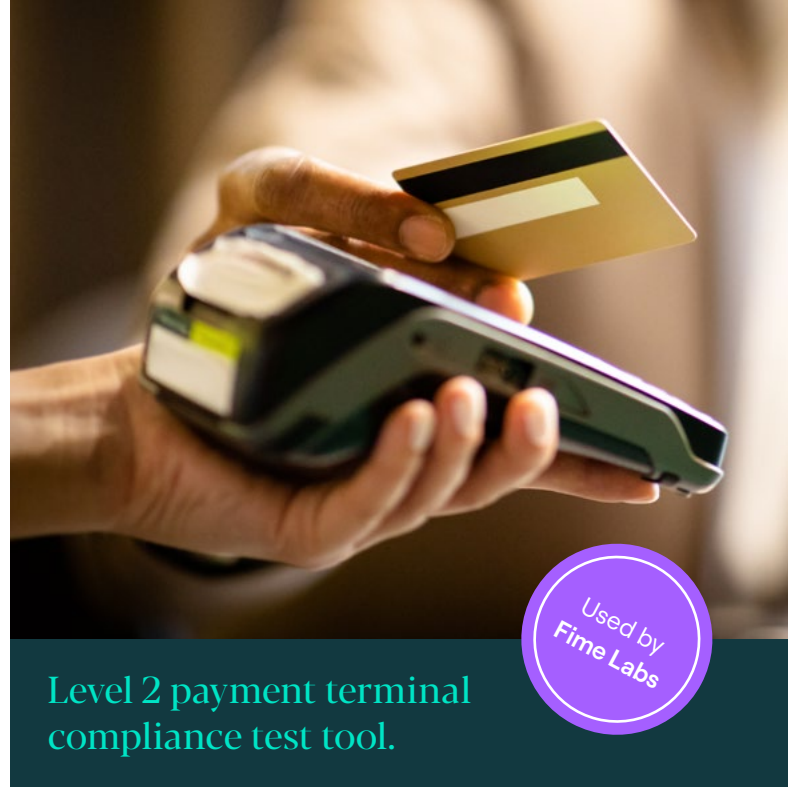

Fime can help you at any stage of your project lifecycle.

Define

Design

Deliver

Test

Level 2 payment terminal compliance test tool.

Key benefits

- Accessible anytime, anywhere with an internet connection.
- Enhance collaboration and testing between distributed teams located across multiple sites and from home.
- Benefit from constant updates in line with the latest specifications.
- Reduce your time to market by accessing different test suites at the same time.
- Save time and money with our automated test tool for in-house development.
- Secure information management certified by ISO 27001.
- Control testing costs with Fime's annual subscription model, including all specification updates.

Key features

- Customized test case selection.
- Automated cloud-based test case execution.
- User-friendly stop-and-start test functions.
- Automatic ICS import.
- Automated report generation.
- Clear test point failure indication.
- Upgradable and scalable test suites.
- Simultaneous execution on various test suites.

What’s in the box?

Probe+ (Eval+ hardware) is delivered in a well-protected suitcase which includes:

- Probe+ device¹.
- USB cable to connect the Fime Probe+.

NOTE1: Probe+ is optional for EMVCo C-8 test suite.

How can we help?

Explore our services.

Powered by Fime Test Factory.

Eval+ is compatible with the value added modules:

- MyTestProcess to digitalize certification project management.
- MyTestStudio to customize testing and create new test cases.
- MyTestRecord to archive a project or a test session and access it in read only mode.

More services.

- **Quick onboarding.**
Personalized user onboarding training.
- **Remote expertise.**
Book a slot and share your session with a lab expert.
- **Easy ticketing.**
Quickly raise a ticket to our team of experts.
- **Remote debug.**
Access remotely to debug environment and share with our team of experts.
